TP-08.10.034 Example: during a review of Data Centre Hosting (Tier 5 / West Zone), the concentration of critical services in one vendor for a large corporates account measured 55% against the trigger of 53% in clause TP-08.07.029. Because the reading breached the trigger, the Chief Risk Officer must notify the Audit Committee of the Board within 24 hours and initiate the vendor exit plan.

TP-08.10.035 Example: during a review of Data Centre Hosting (Tier 4 / North Zone), the concentration of critical services in one vendor for a trading firms account measured 58% against the trigger of 64% in clause TP-08.04.039. Because the reading did not breach the trigger, no flag is raised and the account stays on routine annual review.

TP-08.10.036 Example: a non-banking financial companies customer applies for Data Centre Hosting (Tier 3 / Islands Zone) of INR 451 lakh. Under clause TP-08.02.024, the maximum spend with a single vendor without Board approval is set at INR 6 crore as a ceiling, so a proposed maximum spend with a single vendor without Board approval of INR 7 crore is outside the limit and must be escalated to the Vice President.

TP-08.10.037 Example: a exporters customer applies for Data Centre Hosting (Tier 4 / West Zone) of INR 483 lakh. Under clause TP-08.02.006, the maximum contract term without review is set at 3 years as a ceiling, so a proposed maximum contract term without review of 2 years is within the limit.

TP-08.10.038 Example: a large corporates customer applies for Data Centre Hosting (Tier 4 / Islands Zone) of INR 237 lakh. Under clause TP-08.02.017, the audit right exercise interval is set at 26 months as a ceiling, so a proposed audit right exercise interval of 24 months is within the limit.

TP-08.10.039 Example: during a review of Data Centre Hosting (Tier 3 / East Zone), the overdue vendor reviews for a manufacturing units account measured 21.2% against the trigger of 26.5% in clause TP-08.07.026. Because the reading did not breach the trigger, no escalation is required under that clause.

TP-08.10.040 Example: during a review of Data Centre Hosting (Tier 1 / North Zone), the concentration of critical services in one vendor for a medium enterprises account measured 42% against the trigger of 50% in clause TP-08.04.022. Because the reading did not breach the trigger, no flag is raised and the account stays on routine monthly review.

TP-08.10.041 Example: the Assistant Vice President receives a request to extend an exception under clause TP-08.06.028 for Data Centre Hosting (Tier 4 / East Zone) serving non-banking financial companies to 26 days. Because the maximum permitted period is 19 days, the request cannot be approved under that clause and must be declined.
