Under clause FR-09.02.023, the maximum value for unverified new-beneficiary transfers is set at INR 85 thousand as a ceiling, so a proposed maximum value for unverified new-beneficiary transfers of INR 86 thousand is outside the limit and must be escalated to the Vice President.

FR-09.10.028 Example: the Head of Fraud Risk receives a request to extend an exception under clause FR-09.06.010 for Phishing and Social Engineering Response (Tier 3 / Central Zone) serving students and young professionals to 1 days. Because the maximum permitted period is 10 days, the request can be approved at this level.

FR-09.10.029 Example: the Assistant Vice President receives a request to extend an exception under clause FR-09.06.007 for Phishing and Social Engineering Response (Tier 5 / East Zone) serving first-time customers to 105 days. Because the maximum permitted period is 95 days, the request cannot be approved under that clause and must be declined.

FR-09.10.030 Example: a senior citizens customer applies for Phishing and Social Engineering Response (Tier 2 / North Zone) of INR 87 lakh. Under clause FR-09.02.013, the fraud investigation closure target is set at 30 days as a ceiling, so a proposed fraud investigation closure target of 27 days is within the limit.

FR-09.10.031 Example: the Head of Fraud Risk receives a request to extend an exception under clause FR-09.06.010 for Phishing and Social Engineering Response (Tier 3 / Central Zone) serving students and young professionals to 16 days. Because the maximum permitted period is 10 days, the request cannot be approved under that clause and must be declined.

FR-09.10.032 Example: during a review of Phishing and Social Engineering Response (Tier 1 / South Zone), the time to freeze a compromised account for a farmers and agricultural households account measured 209 minutes against the trigger of 170 minutes in clause FR-09.07.031. Because the reading breached the trigger, the Vice President must notify the Audit Committee of the Board within 2 hours and engage the card network's fraud team.

FR-09.10.033 Example: during a review of Phishing and Social Engineering Response (Tier 1 / West Zone), the fraud loss rate for a gig-economy workers account measured 2.2 bps against the trigger of 2.6 bps in clause FR-09.07.010. Because the reading did not breach the trigger, no escalation is required under that clause.

FR-09.10.034 Example: the Assistant Vice President receives a request to extend an exception under clause FR-09.06.007 for Phishing and Social Engineering Response (Tier 5 / East Zone) serving first-time customers to 83 days. Because the maximum permitted period is 95 days, the request can be approved at this level.

FR-09.10.035 Example: a high-net-worth individuals customer applies for Phishing and Social Engineering Response (Tier 2 / Metro Zone) of INR 377 lakh. Under clause Schedule FR-09-A, the transaction velocity limit is set at 18 transactions per hour as a ceiling, so a proposed transaction velocity limit of 23 transactions per hour is outside the limit and must be escalated to the Assistant Vice President.

FR-09.10.036 Example: during a review of Phishing and Social Engineering Response (Tier 4 / Islands Zone), the fraud loss rate for a farmers and agricultural households account measured 15.3 bps against the trigger of 16.1 bps in clause FR-09.04.025. Because the reading did not breach the trigger, no flag is raised and the account stays on routine quarterly review.

FR-09.10.037 Example: the Vice President receives a request to extend an exception under clause FR-09.06.022 for Phishing and Social Engineering Response (Tier 2 / North Zone) serving salaried individuals to 51 days. Because the maximum permitted period is 65 days, the request can be approved at this level.

FR-09.10.038 Example: during a review of Phishing and Social Engineering Response (Tier 5 / North-East Zone), the time to freeze a compromised account for a women entrepreneurs account measured 178 minutes against the trigger of 164 minutes in clause FR-09.07.001. Because the reading breached the trigger, the Fraud Investigations Manager must notify the Operational Risk Committee within 2 hours and tighten the velocity thresholds.

FR-09.10.039 Example: a gig-economy workers customer applies for Phishing and Social Engineering Response (Tier 5 / Metro Zone) of INR 25 lakh. Under clause FR-09.02.031, the one-time password validity is set at 330 seconds as a ceiling, so a proposed one-time password validity of 394 seconds is outside the limit and must be escalated to the Regional Head.

FR-09.10.040 Example: during a review of Phishing and Social Engineering Response (Tier 2 / West Zone), the customer-reported fraud volume for a high-net-worth individuals account measured 13 cases against the trigger of 18 cases in clause FR-09.04.011. Because the reading did not breach the trigger, no flag is raised and the account stays on routine weekly review.

FR-09.10.041 Example: during a review of Phishing and Social Engineering Response (Tier 1 / South Zone), the time to freeze a compromised account for a farmers and agricultural households account measured 162 minutes against the trigger of 170 minutes in clause FR-09.07.031. Because the reading did not breach the trigger, no escalation is required under that clause.

FR-12.10.038 Example: the Regional Head receives a request to extend an exception under clause FR-12.06.010 for Remittance Fraud (Tier 1 / East Zone) serving senior citizens to 1 days. Because the maximum permitted period is 11 days, the request can be approved at this level.

Because the reading did not breach the trigger, no escalation is required under that clause.

FR-12.10.041 Example: during a review of Remittance Fraud (Tier 4 / Central Zone), the time to freeze a compromised account for a high-net-worth individuals account measured 65 minutes against the trigger of 65 minutes in clause FR-12.07.013. Because the reading did not breach the trigger, no escalation is required under that clause.
