Gold Loan Policy

QA test document — Policy source for RAG, citation, case reasoning and version tests

Policy Rules

GL-01 Maximum loan-to-value (LTV) ratio for eligible gold loans is 75%.

> **Expected:** A question about LTV should return 75% when this document is assigned.

GL-02 For the worked example, a customer requesting ■4,00,000 against 28 grams of gold may be eligible for up to ■3,50,000 at the stated 75% LTV, subject to verification.

> **Expected:** The system should apply the rule to the case and cite this document.

GL-03 Gold purity must be verified before disbursal.

> **Expected:** A case recommendation should mention purity verification where applicable.

GL-04 An existing personal loan does not by itself disqualify the customer, but the outstanding amount must be considered when determining the net eligible amount.

> **Expected:** The case answer should not incorrectly say that the personal loan automatically disqualifies the customer.

QA Trap Questions

T1 What is the gold-loan LTV?

> **Expected:** 75%, with citation to Gold Loan Policy.

T2 Does an existing personal loan automatically make a customer ineligible?

> **Expected:** No, not according to this policy; the outstanding amount affects net eligibility.

T3 Is gold purity verification required before disbursal?

> **Expected:** Yes.
